Datasharing vs risk for core investigation

- TTL, Threat to live (article 3 ECHR)
- Risk for investigation vs Swedish Framework Decision
- Trustworthiness of the obtained information
- Access for defense lawyers to evidence (Einarsson and others vs Iceland) and last week Grand Chamber

International sharing of evidence and arguments

No easy answers:

- **A lot of false information going around**
They didn't intercept communication of every device
- **Difference JIT and third countries (MLAR / EIO)**
- **International case law**
